

Claude Code Slash Commands

The built-in set, grouped for real work. Not every command shows for every user — availability depends on plan, platform, and environment, so your own `/help` is the list that's true for you.

CONTEXT & SESSIONS

`/context`

See where the window is going, as a grid with hints.

`/compact`

Summarize the thread to free space, keep the conversation.

`/clear` `/new`

Start an empty conversation; the old one waits in `/resume`.

`/resume` `/continue`

Reopen a past conversation by name or from a picker.

`/branch`

Fork here to try another direction without losing this one.

`/rewind` `/undo`

Roll code and chat back to an earlier checkpoint.

`/fork`

Hand a side task to a background helper that reports back.

`/recap`

One-line summary of the current session, on demand.

`/diff`

Interactive view of what changed, file by file, turn by turn.

`/export`

Write the whole conversation to a file or the clipboard.

`/copy`

Copy the last response, the Nth-latest, or one block.

`/rename`

Rename the session and show it on the prompt bar.

`/background` `/bg`

Detach the session to keep running and free your terminal.

`/btw`

Quick side question that doesn't bloat conversation history.

MODELS & OUTPUT

`/model`

Switch which Claude you're talking to; save as default.

`/effort`

Set how much reasoning Claude spends: low up to max.

`/fast`

Toggle fast mode on or off.

`/config` `/settings`

Theme, model, output style, and preferences.

`/status`

Version, model, account, connectivity. Works mid-response.

`/usage` `/cost` `/stats`

Session cost, limits, activity; breakdown by skill and tool.

`/theme` `/color`

Change the color theme or this session's prompt-bar color.

`/focus`

Show only your prompt, a tool summary, and the answer.

`/voice`

Toggle voice dictation.

MEMORY & PLANNING

`/memory`

Edit the CLAUDE.md files that load every session.

`/init`

Write a starter CLAUDE.md for the current folder.

`/plan`

Plan mode: read and think, act only on your approval.

`/goal`

Set a condition Claude keeps working toward across turns.

SKILLS & CONNECTIONS

`/skills`

List your skills; sort by size; hide ones you don't want.

`/plugin`

Browse and manage plugins, which bundle skills.

`/reload-skills`

Re-scan skill and command folders without restarting.

`/reload-plugins`

Reload active plugins to apply changes.

`/mcp`

Manage connections to outside tools and services.

`/agents`

Manage the helpers Claude can delegate side tasks to.

`/tasks` `/bashes`

List and manage background tasks.

`/hooks`

View the automations that fire on tool events.

`/permissions` `/allowed-tools`

Allow / ask / deny rules for what Claude can do.

RESEARCH & REVIEW *bundled skills*

`/deep-research`

Fan out web searches, cross-check, return a cited report.

`/code-review`

Read the work, flag what's weak, optionally fix it.

`/review` `/security-review`

Deeper read-only passes over recent changes.

`/simplify`

Clean up changes without bug-hunting.

`/batch`

Split a large job into many parallel units.

`/loop` `/proactive`

Run a prompt repeatedly while the session stays open.

AUTOMATION

`/schedule` `/routines`

Routines that run on a schedule, on Anthropic's infra.

`/workflows`

Watch, pause, resume, or save running workflows.

`/insights`

A report on your own session patterns and friction.

DEVICES & ACCESS

`/desktop` `/app`

Continue the current session in the desktop app.

`/teleport` `/tp`

Pull a web session down into this terminal.

`/remote-control` `/rc`

Control this session from another device via `claude.ai`.

`/mobile` `/ios` `/android`

Show a QR code to get the Claude mobile app.

`/chrome`

Configure the Claude-in-Chrome browser settings.

SETUP & UTILITY

`/help`

Show help and the commands available to you.

`/login` `/logout`

Sign in to or out of your Anthropic account.

`/doctor`

Diagnose and verify your installation and settings.

`/debug`

Turn on debug logging and troubleshoot from the log.

`/keybindings`

Open or create your keyboard-shortcut file.

`/feedback` `/bug` `/share`

Report a bug or share your conversation.

`/release-notes`

View the changelog in a version picker.

`/exit` `/quit`

Exit the CLI.

DEVELOPER & SETUP *skip unless you connect GitHub or a cloud model provider*

`/install-github-app`

Set up the Claude GitHub Actions app for a repo.

`/install-slack-app`

Install the Claude Slack app; opens a browser for OAuth.

`/web-setup`

Connect GitHub to Claude Code on the web via your gh CLI.

`/autofix-pr`

Web session watches a PR and pushes fixes when CI fails.

`/setup-bedrock`

Configure Amazon Bedrock auth (env-gated).

`/setup-vertex`

Configure Google Vertex AI auth (env-gated).

JUST FOR FUN

`/powerup`

Interactive feature lessons with animated demos.

`/radio`

Open Claude FM lo-fi radio in your browser.

`/stickers`

Order Claude Code stickers. That's the command.
